

Baseball GamePool App

Overview

GamePool is an advanced baseball betting app for baseball pools and game parties. It is designed to provide you with a number of options for running a pool and enhance the game experience of all participating players.

GamePool has the functionality of two types of baseball pools-

1. Pool for a single game with any number of innings, and
2. Pool for a complete series with up to 7 games.

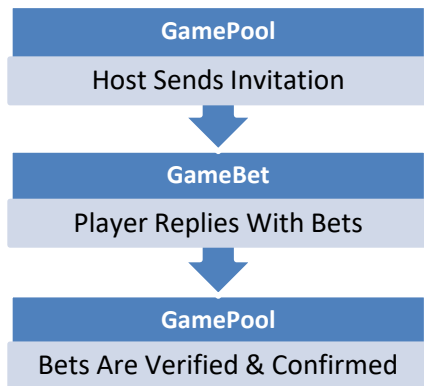

Each of the above pools can be created with a multitude of options, including-

- One time randomized allocation of squares for the game or the series to the participants
- Separate randomized allocation for each inning of a game or each game of the series
- Simple or cumulative scores in determining Square winners
- Automatic restructure in case of game going to extra tie-breaking inning
- Automatic determination of payouts based on how many games finish a series

GamePool has multiple game plays and offers you a variety of ways to coordinate for bets.

Baseball GamePool can be used in two ways-

- Stand-alone mode where you enter player bets and manage the pool, and/or
- Collaboration mode where you invite player to make their bets via Baseball GameBet app while you manage GamePool. The collaboration between the host and player works as shown-

You can pick & choose which player bets are entered manually or entered using the invitation method. GamePool can send invitations, receive responses and send out bet confirmations, each with one click.

It provides an easy way to host a baseball pool that determines and informs the winners. Its multiple game plays generate more winners in each inning (each game in case of series). Its personalized game tickets, sharable game stats, personal notification to each winner, remote bet submission and unique multimedia presentation can make your pool a success and an enlightened game party.

It provides an easy way to host a baseball pool that determines and informs the winners. Its multiple game plays generate more winners in each inning (or game if playing a series). Its

personalized game tickets, sharable game stats, personal notification to each winner, remote bet submission and unique multimedia presentation can make your pool a success and an enlightened game party.

It provides you with unique displays, reports, bet accounting, easy setup with vocal and photo features to personalize the game for each participant and make it enjoyable for all players.

GamePool can voice announce the results after each inning and each game with individual presentation for each winner. It can provide you with a catchy short presentation after each inning or game on TV via Apple TV or another similar interface.

In its simplest form GamePool offers you a quick, efficient and automated alternative for drawing 100 squares on a piece of paper and getting squares allocated to each participant. The app is flexible and can be used for just what you need.

Key features-

- Provides two types of pools-
 - Game pool
 - Series pool
- Provides four type of bets-
 - Game winner
 - Combined score winner
 - Lucky Square winners
 - Super Cross winners

You can turn on or off any of these components

- Allocation of squares is random. You have a choice to
 - Randomize allocation at beginning only, or
 - Randomize for each inning or game of series
 - Scrollable multiple grids are displayed when randomized each event is selected
- Score counting for Lucky Squares in a series can be-
 - Linear as the score of each game, or
 - Cumulative up to each game of the series
- Modifiable betting costs
- Players bet only what they want
- Customizable with
 - Player display names
 - Player vocal names (winner name is called in player's voice if entered)
 - Player photo (winners' photos are displayed in entered)
- Seamless accounting for each bet and the pool
- Produces and emails a Bet Ticket to each player
- Automatic winner payout determination based on all bets
- Automatic winner determination for
 - Lucky Squares, and
 - Super Cross
- Automatic final game & score winners and the payout amount of each win
- One click email notification to all Game, Score, Lucky Square and Super Cross winners
- Custom presentation for each inning of a game pool and each game of a series pool including-
 - Vocal announcements
 - personalized sounds and pictures of winners

- Bets can be entered by the host directly or submitted remotely by players by using the Baseball GameBet app
- One-click option to send bet invitation to the player you want to include in the pool.
- Contains all MLB & NCAA teams. You can define additional teams.
- Save and use multiple games and multiple player sets
- Up to 5 players and 5 bets can be entered and played in the standard free version.
- GamePool can be played on all iOS devices in landscape and portrait screen orientations

You can create multiple pools with any options. They can all coexist in GamePool.

It is suggested that you should do a practice run or two of the app before creating the first real pool. This will help you in making the right choices in its creation and insure a positive experience.
