

Football GameBet App

Overview

GameBet is designed for use by a player participating in a football pool hosted on a GamePool app. The GameBet app supplements the interchange of profile and game bet information between the player and the host.

It provides a convenient way to compose and submit your game pool bets.

GameBet provides you the ability to perform following tasks-

- Prepare personal profile and betting information for submission to the host
- Import the game invitation sent by the host
- Allows host invitation to be filled with details and resubmitted to host
- Update GamePool host for new or changing information
- Place Game and Score bets in your profile
- Request host an allocation of Lucky Squares
- Add a selfie or other photo in the profile
- Add your name vocals in the profile
- Submit profile to activate the bets in the host pool

GameBet can be used to place new bets to the game pool or it could be used in collaboration with the game pool host. The collaboration mode allows for an efficient way to exchange bet and profile related details with confidence. It works as follow-

1. Hosts sends player a personalized invitation via email
2. Player imports the invitation in the GameBet app
3. Player adds the desired bets and other details
4. GameBet send back completed bets to the host
5. Host acknowledges the bets and inclusion in the pool
