

GamePool Overview

GamePool is an advanced football betting app for office pools and home game parties. It is designed to enhance the game experience of all participating players.

GamePool has multiple game plays and offers you a variety of ways to coordinate for bets.

GamePool can be used in two ways-

- Stand-alone mode where you enter player bets and manage the pool, and/or
- Collaboration mode where you invite player to make their bets via GameBet app while you manage GamePool. The collaboration between the host and player works as shown-.

You can pick & choose which player bets are entered manually or entered using the invitation method. GamePool can send invitations, receive responses and send out bet confirmations, each with one click.

It provides an easy way to host a football pool that determines and informs the winners. Its multiple game plays generate more winners in each quarter. Its personalized game tickets, sharable game stats, personal notification to each winner, remote bet submission and unique multimedia presentation can make your pool a success and an enlightened game party.

It provides you with unique displays, reports, bet accounting, easy setup with vocal and photo features to personalize the game for each participant and make it enjoyable for all players.

GamePool can voice announce the results after each quarter with individual presentation for each winner. It can provide you with a catchy short presentation after each quarter on TV via Apple TV or another similar interface.

In its simplest form GamePool offers you a quick, efficient and automated alternative for drawing 100 squares on a piece of paper and getting squares allocated to each participant. The app is flexible and can be used for just what you need.
